Local Detachment Win Regimental Shield.

The local detachment of the 15th Light Horse returned Sunday from their two week's training at Sarcee Camp and the boys looked fit and sunburned.

They claim that the camp was the best they had attended and they were successful in winning the regimental shield for general efficiency, receiving 90 points out of a possible 100.

Sergt. Maj. Garner appears to be very proud of his boys

Commence Cutting Barley Crop.

Mr. Abe Boutin informs us that he commenced cutting a fifty acre field of barley on Tuesday noon.

The crop appears to be fairly well filled and it is expected to yield 30 bushel to the acre.

Mr. Boutin says this is the earliest he has cut grain since coming here 33 years ago.

LACHMAN--STADELBAUER.

Mr. Howard Roy Lachman, son of Mr. and Mrs. Wm. Lachman, of Alsask, Sask., and Mildred Naomi, youngest daughter of Mrs. Stadelbauer and the late John Stadelbauer of Didsbury, were united in marriage on July 28th at the M.B.C. Church, with Rev. D. C. Eby of Alsask, officiating. Rev. C. J. Hallman and Rev. E. G. Archer assisted.

The bride was attired in white sheer and carried a bouquet of pink gladioli and rosebuds. Attending her was Miss Beatrice Lachman, sister of the groom, who wore pale yellow crepe and carried a bouquet of sweet peas. Mr. Ian Stauffer attended the groom.

Preceding the ceremony Mr. W. Sherick sang, "Love never faileth," and at the conclusion of the service Rev. C. J. Hallman rendered the solo, "He will walk with me."

Mr. and Mrs. Lachman will make their home in Alsask, Sask.

W.I. Constituency Conference at Rugby

The Didsbury constituency conference of the Alberta Women's Institute was held at Rugby on Friday July 26th.

Mrs. M. I. McKenzie, Knee Hill Valley, Alta., Director of District No. 3 was present. Constituency convenor Mrs. F. Himmelreich of Siebertville, presided while Mrs. J. N. Devolin of Didsbury was secretary.

Mrs. Ed Parker of Rugby gave the address of welcome which was replied to by Mrs. Ruth Eckel, of Lone Pine.

Secretaries of Rugby, Siebertville, Lone Pine, Mountain View, Big Prairie, Westcott, Sunnybrook and Cremona each gave a report of their W.I. during the past year.

The following convenor's reports given:

"Education and better school," Mrs. B. Woods, Lone Pine.

"Legislation," Mrs. H. Pearson Mountain View.

"Home economics," Mrs. Ed Parker, Rugby.

"Child welfare," Mrs. H. Hosegood, Rugby.

"Handicrafts," Mrs. Shannon, of Rugby.

Agriculture and Canadian industries," Mrs. A. M. Robertson, of Westcott.

"Immigration," Mrs. J. M. Devolin, Siebertville.

A new convenor for war work was appointed: Mrs. J. M. Robertson, Westcott.

The handicraft exhibit brought out keen competition, with Rugby winning first place, Mountain View second and Siebertville third.

Entertainment was provided by the various Institutes during the afternoon, while a picnic lunch was served at noon.

Didsbury was chosen for the meeting place for the next conference.

Rev. Earl Archer left on Thursday last for Gallahad, Alta., where he is conducting camp meetings.

WEDDINGS

WHITE--JOHNSTON

A pretty wedding was solemnized under an archway trimmed with flowers on the lawn of Peter Johnston, on July 16, when his daughter, Laura Edna, became the bride of Joseph White, son of Mr. and Mrs. W. White, Rev. J. M. Fawcett officiating.

Given in marriage by her father, the bride looked charming in a floor length gown of mauve sheer. She wore a floor length veil held in place with orange blossoms and carried a bouquet of pink carnations. Mrs. Ernest Wilkins, sister of the bride, the bridesmaid, looked lovely in a floor length gown of pink sheer and carried white carnations. Shirley Vetter of Three Hills, niece of the bride, was a very lovely flower girl.

Mr. Ernest Wilkins attended the groom. Mrs. Ronald McRae, sister of the groom played the wedding march and during the signing of the register Mrs. Ralph Jackson, sister of the groom, sang "I Love You Truly."

After the ceremony a reception was held for 40 guests. The bride's table was centered with a three-tiered wedding cake and a bride's cake decorated with flowers and fern.

In the evening a wedding dance was held at the Melvin Hall which was attended by a large crowd of friends.

The happy couple spent a short honeymoon at Banff and returned via Jasper and Edmonton.

WORLD HAPPENINGS BRIEFLY TOLD

President Roosevelt asked congress for authority to establish daylight saving standards the year around in the United States.

Defence headquarters revealed decision to call Canada's armored division now in process of formation and of training the 5th Canadian Division.

Dr. Emilio Delboy, Peruvian congressman, said that he believed the recent strife between Peru and Ecuador was caused by Nazi agitators.

Merchant shipping losses of 79 ships totalling 329,296 tons during June were announced by the admiralty.

Since the present war began London jewellers report a 50 per cent. increase in the sale of engagement rings.

S. A. Lozovsky, Soviet vice-commissar for foreign affairs, told a press conference that Russia's 1941 grain crop was the richest in Soviet history.

Great Britain will take about 2,250,000 bushels of United States government-owned corn under the lease-lend program, agriculture department officials said.

Canadian Red Cross headquarters revealed that 265,936 parcels have been sent to British prisoners of war in Germany since January of this year.

New Type Of Shelter

Will Be Supplied Free To People With Small Incomes

Warm and comfortable indoor shelters are gradually replacing the cold Andersons and other murky underground structures which were built in many gardens of private houses in London at the beginning of the war.

Decorated to harmonize with the furnishings the shelter take their place in suburban or town villa as part of the equipment of the modern dining room. Some types house four adult sleepers comfortably. Others are made for two adults and two children. In some the top bunk can be let down to form a settee.

The government-sponsored type of indoor shelter can be converted into a table. It is built of steel, six feet six inches long by four feet wide. The top is a stout sheet of steel; the floor is sprung to make a comfortable base for a mattress. The sides of steel mesh can be removed when the top is being used for a table. The shelter is supplied in sections for assembly by the householders themselves in accordance with simple instructions.

Herbert Morrison, minister for home security, in announcing the new design in the House of Commons, said that though it was not proof against a direct hit, he considered it excellent cover from the debris of a two- or three-story house. The shelter had been tested by dropping a heavy weight on it and by a swinging blow like that of a collapsing floor.

The government plans to supply these shelters free to people with incomes of £250 or less. The income limit for free issue of the Anderson shelter was £250.

Motorcycles For Britain

Indian Motorcycle Company at Springfield, Mass., said the United States government has ordered 5,000 special light army motorcycles for Great Britain at a cost of \$2,050,000. Deliveries will start in September.

King George VI. of England belongs to the royal house of Windsor.

Twelve states of the United States have laws against driving too slowly.

For Canadian Nurses

English Tea Merchant Turns Over Estate For Leave Home

On the beautiful country estate of an English tea merchant, the Canadian army has established a leave home where Canadian nursing sisters can find relaxation from hospital duties. The estate was turned over to the Canadians by Col. and Mrs. Kenneth Maitland in gratitude to Canada where three of their four children now are living safe from air raid terrors. Col. Maitland is the leading executive of a huge English tea concern. The children are at school near Montreal. Thirty-five nurses can be accommodated at one time and they have the run of the large mansion and the 75-acres of land surrounding the houses. The Maitlands have turned over the whole house to the nurses, fixing up rooms over the garage for their own use. The home was opened by the Rt. Hon. Vincent Massey, Canadian high commissioner in London and Mrs. Massey. Sister A. J. MacLeod of Edmonton was present at the ceremony.

DRESS MADE IN VERY FEW PARTS

By Anne Adams

Cool comfort and pert, youthful charm are combined in Pattern 4651, an Anne Adams midsummer special! The open diagram view shows how simple a style it will be to cut and sew, for its planned in a minimum of pattern parts. The entire front is cut in one piece, with side slashes high above the waist to hold up the gathered softness of the bodice. The back is in slim panelled style. Even the cool cap sleeves are simple to do, for they're cut in-one with the bodice. Darts keep your shoulders trim; the square neckline is most becoming. Consider stitching up two versions: one in a printed sheer fabric with lace and ribbon-bow trim; the other in sturdy ric-rac edge cotton. Do order your pattern right away!

Pattern 4651 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38, 40 and 42. Size 16 takes 2 1/2 yards 35 inch fabric and 2 3/4 yards lace edging.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Cuts Down On Smokes

King George has cut down on his cigarette smoking because of the shortage, Queen Elizabeth told workmen in a north London dormitory. The king normally smokes from 10 to 15 cigarettes daily. The queen did not say how many he had decided to go without.

Sweden has nearly 50,000 vehicles running on gas from wood or charcoal.

Halley's comet is mentioned by many historical sources dating back to 240 B.C.

Devoted To His Country

Paderewski Gave Himself And His Fortune To Poland

When Clemenceau met Paderewski at Versailles in 1919, he said: "You are Paderewski, who was once the world's greatest pianist?" "Yes," answered Paderewski. "And now you are the Premier of a country?"

"Yes."

"Mon Dieu," said Clemenceau, "what a comedown."

Paderewski did not agree. He was a patriot first and a pianist afterward. Above even the brilliancy for which he strove as an artist was his dream for the creation of a united nation from a divided Poland. In his country's behalf, he foresook his career at its brightest and yielded his fortune. When the World War began, his wealth was in millions; when it ended his purse was empty and he was in debt. His surpassing musical gifts and all they had come to mean in his life, Paderewski abandoned eagerly for his country. Hope of a liberated Poland had been his from birth. He was not three years old when the village of Kurilowka on Podolia, then part of Russian Poland, where he was born on November 6, 1860, was ravaged by Cossacks putting down a Polish uprising. His father, a land proprietor, was sent to Siberia. The memory of that exile seared Paderewski's exile evermore. He remembered it when the Czar long afterward told him that he was happy to have so distinguished a subject.

"Sire," Paderewski replied, "I am a Pole."

Blood Banks

Red Cross To Establish One In Edmonton This Year

Plans for establishment this year of a Red Cross blood bank in Edmonton, to collect donated blood and send it to Britain, was announced by Elmer E. Roper, president of the Edmonton branch of the Canadian Red Cross Society.

The objective is a panel of 2000 donors. At least 100 donations a week will be taken.

The blood will be refrigerated, processed into serum and sent to Red Cross headquarters in Toronto where it will be dried and shipped to Britain, Mr. Roper said.

Toronto, Hamilton and Ottawa already have blood banks, and others are planned in various centres across the Dominion.

A Real Adventure

Vell And Camel Aid Escape Of South African Pilot

This story was told by Godfrey Anderson, Associated Press staff writer:

A South African Tomahawk pilot, who fooled German sentries by his disguise as a veiled Arab woman leading a camel in back with his squadron on the desert.

Although he tramped 100 miles across the sand in constant danger of discovery by enemy patrols, the worst he suffered was blistered feet and a riotous welcome as "the glamor queen of the desert."

The 22-year-old pilot, whose home is in Johannesburg, was shot down by anti-aircraft fire while ground-rafting Nazi motor columns June 18 in Cyrenaica. When his American-made plane crashed in a wadi he leaped out unharmed and ran into the desert to escape German patrols rushing to the wreck.

After hiding for seven days in a deep waterhole, he crept out disguised as a veiled native woman, with an Arab guide. Travelling nights, he pushed across the desert, preferring to walk rather than endure the discomfort of a jolting camel's back.

Once the camel nearly betrayed him when it decided to kneel in the middle of a desert track as an Italian truck approached.

When his beard grew too thick for a veil to conceal, he changed sex overnight. Came the dawn and the grubby camel driver was hailed from a passing tank. He thought the game was up till a voice cried in English: "Who the hell are you?"

When he returned to his camp he found he had been posted as missing and all his kit sent back to base.

This is the second time this pilot has returned afoot. He walked back into the Sudan from Ethiopia earlier in the war and now qualifies for membership in the late-arrival club of pilots who have returned from the desert, and will wear the emblem of the winged boot.

Only Gear She Knew

The traffic officer asked the pretty miss what gear she was in at the time of the accident, and she replied that she had on a blue woollen sports coat, fur cap, gauntlet gloves and tan shoes.

A great "canyon," ranging in depth from 500 to about 8,400 feet has been charted on the floor of the Atlantic a short distance southeast of New York.

AMERICAN SWIMMING STARS TOP THE PEAKS AT BANFF

—C.P.R. Photo.

Four fair Floridians—all from Miami, and three of them sisters—have visited the warm sulphur outdoor pool of the Banff Springs Hotel and found the water fine, like every other tourist. Dominating the Bow River Valley and the 20-mile distant peaks of the Fairholme Range, the diving-board line-up reads, left to right (and don't be fooled by the masculine names): Betty Joyce, Pat Joyce, Skip Joyce and Jim Fairbrother.

Pat is the 1940 National Diving Champ of the A.A.U. Betty was a member of the 1940 National Ladies' Relay Team of the A.A.U.

The girls proceeded from Banff to the Chateau Lake Louise where they swam and dived in the Chateau's glass-walled outdoor pool. The elevation at Banff is 4,600, and the sulphur pool's temperature is 90 degrees. At Lake Louise (elevation 5,600 feet) the pool has fresh water with the glacial chill taken out of it.

A NATIONAL HEALTH POLICY

Pleading for a more aggressive national health policy, with Federal grants to the provinces, Dr. Gordon Bates, General Director of the Health League of Canada, predicted that with adequate building up of national public health policies and the cultivation of a live public attitude toward the problems of health conservation, venereal disease, among other diseases, might one day be eliminated from Canada.

Dr. Bates, commending the recent outspoken attitude of the Federal Minister of Pensions and Health, Hon. Ian MacKenzie, said that "we must stop thinking of health as a parochial matter. National health should be our objective. Only as we fight together on a united front will we achieve our great ideal: health for all Canadians and hence a greater Canada."

He said, "some public health authorities suggest that there is no moral aspect to the venereal disease problem or if there is it is the business of the churches. With this attitude I take sharp issue. If we are to control venereal disease by chemical means alone and by so doing damage the moral fibre of our people, then our last stage will be worse than our first and we may well emerge without even physical health, without religion and as close to paganism as is Germany because without morality, religion goes also."

Plenty Of Japs

Japanese Empire Now Beyond The Hundred Million Mark

An article from Tokyo in the Christian Century reports great satisfaction in all circles in Japan over the result of the 1940 census. The Japanese empire's total population has gone beyond the 100,000,000 mark, standing now at 105,226,101, an increase of over 6,000,000 since 1935. Japan proper has a population of 73,114,308. The Korean people number 24,326,327. Tokyo and Osaka have grown more than 10 per cent. in five years, and the population of Tokyo alone, 6,778,804, is now as great as that of all Australia. Nevertheless, more emphasis is being given to early marriage, increased birth rate, eugenics and infant mortality.—Victoria Times.

Vacation time is when a wife can get a trunkful of stuff into a suit case.

Cotton can be spun so fine that a pound of cotton will make 250 miles of yarn.

DAUGHTER OF DESTINY

—BY—

Eleanor Atterbury Colton

CHAPTER XVI.

Jose Macias, waiting for Devona in the lobby, smiled instant approval. "You are beautiful to-night, Devona," he murmured, his hand on her elbow.

So it was "Devona" already, she noticed. The "Miss Raebourne" of the afternoon, replaced already. "Thank you," and kept her smile casual.

The El Mexicano lobby was as crowded as the Brownstone had been deserted. Macias, as he took her wrap, handed it to a white-capped maid, ran an appraising glance over Devona's smooth white shoulders, her softly rounded breast, her slim straight lissness, moulded by the soft velvet.

"Very beautiful, Devona," he said again and smiled—a smile that sent a little chill to the tips of her toes.

"Thank you," flushing in spite of herself. "You are very kind."

"No," he raised an eyebrow at her as he led her toward a small table where two waiters hovered solicitously. "Not kind, but very lucky."

Devona wouldn't let herself hear that. Instead, she slipped into the chair Macias held for her, glanced quickly around the room. If Dale should see her now—

The room held, not Dale, but hundreds of beautifully dressed women and their good-looking escorts. Some in evening dress, some in expensively careless sports clothes, some in business grays. All obviously pleasure-seeking. All just as obviously accustomed to paying well for their entertainment. A hot-spot Dale had called this. An expensive one, anyway. But a strange collection of people at that—a man who looked as if he might be an underworld baron, dancing with a girl young enough to be a baby star.

The dinner Macias ordered was excellent. And, Devona smiled at herself, she'd learned to appreciate good dinners! Relaxing a little over the coffee and creme de menthe, she tried to believe she'd been overly suspicious of her smiling host. The conversation had been casual, almost commonplace.

Macias smiled at her and asked: "You like it here?"

"Of course. It's fascinating." It was, too. Interesting-looking people; gay, haunting music; excellent food; a sort of well-behaved carnival spirit pervading it all. Who wouldn't find it fascinating!

An unwanted memory turned up suddenly. "Interesting, but no place for a sweet kid like you," Dale had said once. Little did he know, she thought bitterly. And little had she known then what would be his share in the circumstances that had sent her here—no longer a child, no longer able to choose where she would go!

"Good. I'm glad you like it. And do you think you will like singing the songs my troubadours play?" Macias went on, nodding toward the three-guitar-strumming musicians who wandered from table to table, plucking out stirring Spanish melodies

from their soft-throated instruments. "Yes—I'll love it!" she fibbed extravagantly.

"Good." He reached for her hand, pressed it gently.

Forcing her fingers into impassivity, she let them lie cool and limp in his warm hand for an instant. Then, as if unaware that she did it, withdrew them, pretended to refasten a loosened curl.

"And now—would you like to sing for us?"

"Now!" Stage fright struck her. "Oh—I—"

"The first song you sang for me this morning," he smiled. "I think my patrons will like it."

He announced her then and there was a spattering of applause, and a little murmur trailed her up to the platform. She must do her best, prove to Macias he hadn't been mistaken in giving her this job. She should be—she was everlastingly grateful to him. She'd show him that now.

But standing there, alone, and terribly frightened, in the glaring isolation of the white spotlight, she knew she was failing. Her voice, faltering, unsure of the notes, lost in the huge dining room, sounded like some stranger's. Nervousness jerked at her knees, made her mouth dry, contracted her throat. It was awful.

She sang two numbers. And that was two too many, she thought miserably as she slipped back to the table where Macias waited.

"I'm terribly sorry. That was so awful," she gasped, sank trembling into her chair.

He smiled. "You were frightened, that's all. You will get over that. And with the costumes and the real Spanish songs—they will like you all right. You'll see."

Grateful for that straw of encouragement, Devona smiled. "You really think so."

"But of course. Come. I'll prove it." Rising he led the way to that little private office across the foyer.

Closing the door on the gayety outside, Macias moved to the polished desk, took a long, formidable-looking document from a drawer. "Suppose we draw up a little contract."

"A contract!" Devona echoed, puzzled. "But that won't be necessary, will it? I mean, I'm so grateful for the opportunity—"

Macias unscrewed the cap to his fountain pen. "A contract will be a protection to—both of us," he said, calmly filled in blanks on the long sheet. "First—your name. Devona Raebourne is too long. He thought a moment. "We'll call you—Dona Carlotta."

Devona shrugged. A new job. A new life. A new name. Perhaps even a new fate. What difference did it make! No one had tried to find Devona Raebourne. No one would ever hunt for Dona Carlotta!

Then, as Macias talked on, she realized that her hours on this job would be long—the cocktail hour until 2 when the bar closed. Her costumes must be paid for out of her small salary. Her songs would be selected by Manuel and the three troubadours. Her tips would be hers to keep.

Tips! Devona throttled her pride. Tips for what? Dancing, it seemed, with patrons who needed a partner. Playing hostess to parties Macias wished entertained.

She set her jaw, banished her last convent-bread scruple to the dark closets of her mind. This was a job. She'd tackled it. She'd see it through. She had to. There was no other way out.

With fingers that shook until her signature was almost unreadable, she affixed her name to the document that bound her to Macias for one year from date. That Rubicon was crossed, she thought as Macias blotted the signature carefully, laid the paper in a drawer. Desperately, she fought the feeling that she'd sold herself. A year wasn't long. She could stand anything for a year. And by that time maybe some other solution would be possible.

"Now—may I take you home?" he smiled again.

"Yes—please," and waited quietly while he sent for her wraps, ordered the car.

On the sidewalk outside the club, a newsboy shouted an extra. For a moment, Devona didn't notice. Then her glance snagged on the glaring black headline. ASSISTANT D. A. FACES DEATH, she read and her breath stopped in her throat. As-

STOP Scratching

Relieve Itch Fast or Money Back
For quick relief from itching of eczema, pimples, athlete's foot, scales, scabies, rashes and other externally caused skin troubles, use fast-acting, cooling, anti-itching, liquid D. D. D. Prescription. Greaseless, stainless. Soothes irritation and quickly stops intense itching. 3-oz. trial bottle proves it, or money back. Ask your druggist today for D. D. D. PRESCRIPTION.

sistant D. A. But that was Dale.

The boy held the paper toward her beseechingly. "Paper miss?"

"Assistant Dale Brasher injured in gun battle," she read and her eyes looked at the blurry picture of him.

Dale—hurt! But how badly. Was he—had they—

"Well, our young friend Brasher getting into difficulties," Macias, at her elbow, drew her back to herself.

She nodded, turned deliberately and stepped into the waiting limousine. "Yes, it looks that way."

Macias, seating himself beside her, smiled strangely. "You are interested? Shall I get a paper for you?"

Devona shook her head.

"No; not at all interested." And, hating herself for the clamor her heart had set up, hoped devoutly that Macias hadn't noticed her confusion.

But, once back in the hotel, she snatched a paper from the stands, took it, trembling, up to her tiny room. There she read every word. About the raid Dale had planned, the terrifying exchange of gunfire, of his being wounded, shot through the lung, of the ultimate escape of the gunmen. And suddenly she was remembering a conversation by a moonlit pool.

"It's uncanny," Dale had said. "Just when I think I have it all set, some one tips them off."

And now he was hurt—perhaps seriously. Hungrily she studied the blurred newspaper picture. Dale all right. The same straight jaw line, same clear-eyed expression, same obvious determination in those fearless blue eyes.

Then her fingers closed fiercely over the page, crushed it into a tight ball, flung it into the metal wastebasket, where it dropped with a dull thud. And, sobbing, she flung herself face down on the hard bed.

Fearless blue eyes that had looked squarely at her and pretended to speak of love. Love! You only asked of life that it give you love and loyalty. Instead, you got heartbreak. Her slim, tired body shook as she wept until all tears seemed drained from her, leaving only dry, racking sobs.

Finally she sat up, dried her eyes resolutely. "Daughter of a strange destiny," she said aloud. Maybe that had to be, she thought wryly. But there was no use weeping because life wouldn't behave like a pretty dress.

Then, even as she slipped out of the pretty red velvet, hung it in the back of her closet, she tried to put Dale out of her thoughts. She'd learn to hate him. With every shred of pride and self-respect she had. He'd imposed on her. She'd never forgive him for that. And she didn't really care now what happened to him—ever.

To-morrow she'd meet Macias for luncheon, as he'd "invited" her to do. After that she'd begin her new life.

"Devona Raebourne is dead," she said to the pretty red gown. "Long live Dona Carlotta!"

(To Be Continued)

Another Point Of View

Writer Explains How People Can Find Joy In Germany

The following illuminating example of "solemn nonsense" in Nazi Germany is perhaps worth publicity. It is from a recent article in a German paper and is published in the London Times. The writer is concerned to prove those who complain about the joylessness of the times. "Joy in these days," he says, "must be found in small things. For example, the housewife unexpectedly finds an old collar which can still be used. . . . She has joy. Many other similar examples," the writer goes on, "can be given. . . ."

Commencement being over the graduates want to know where to commence.

There are 8,060 monuments and markers marking the Canadian-United States boundary.

In recent years about one-third of oil consumed in Great Britain has come from Iran.

Test Was Successful

Inventor Actually Walked Across Detroit River In Rubber Suit

The Scott Rubber Suit for Walking Across a Body of Water lived up to its name in a test on the Detroit river, but the inventor of the suit, Arthur Scott, was pulled two miles downstream by the current before he made the crossing of less than a mile.

The crossing, from the foot of Marquette Drive to the bathhouse on Belle Isle, was made by Scott in two hours and five minutes.

Besides the current, Scott, who has labored for 27 years on his invention, encountered a sea of weeds in what the nautical men along the river call the Middleground, and for a brief distance was walking on the sandy bottom.

Literally, Scott was not walking on top of the water but, in the specially constructed rubber suit which he designed, he walked through the water, submerged almost up to his armpits.

The suit weighs 38 pounds and looks much like a diver's suit except for the missing helmet. Inside the suit is a bulky belt with 12 sealed containers. These hold nothing more mysterious than air and provide the buoyancy which keeps Scott afloat.

At the bottom of each boot he has a five-pound weight, providing ample anchorage so that he can't tip over. On his left shoulder he has a light which, he says, can be seen for several miles.

Locomotion is provided by fin-like contraptions fastened to each leg which push the water backward much like the oars of a boat. In addition, he uses his hands, which are encased in rubber gloves.

After the tedious crossing, Scott, who is 58 years old and lives at the Washington Hotel, said that he was not fatigued but regretted that those who had accompanied him in boats had failed to provide him with a drink of water.

"The suit proved everything I said it would," he stated jubilantly. "Not a drop of water came in and I was just as comfortable as if I were walking on land."

An interior decorator now, Scott first became interested in figuring out something that could be worn to walk on water when he was a sea-going chef and other members of the crew kidded him because he couldn't swim.

This is the third suit he has made. One he was wearing for a scheduled test walk from the foot of Marquette last year became punctured on rocks. The first suit he tried took on too much water.

GEMS OF THOUGHT

BEHAVIOR

What a man does, not what he feels, thinks, or believes, is the universal yardstick of behavior.—Benjamin C. Leeming.

Be civil to all; sociable to many; familiar with few; friend to one; enemy to none.—Benjamin Franklin.

Never return evil for evil; and, above all, do not fancy that you have been wronged when you have not been.—Mary Baker Eddy.

Let us be true: this is the highest maxim of art and of life, the secret of eloquence and virtue, and of all moral authority. Amiel's Journal.

What is becoming in behavior is honorable, and what is honorable is becoming. Cicero.

Oddities and singularities of behavior may attend genius, but when they do, they are its misfortunes and blemishes. Sir William Temple.

Speaking Of Expense

The New York Post says: Random House received the manuscript of Reynold's new book, "Don't Think It Hasn't Been Fun." Quentin sent it by Clipper and the airmail postage was \$17. Bennett Cerf, the publisher, immediately cabled Reynolds: "We're not publishing the book until next spring. So what was your hurry, and why waste \$17 postage?" That cable cost \$19.

HOME SERVICE

COWBOY DITTIES FUN FOR DREAMY SUMMER DATES

WONT YOU THINK OF THE VALLEY

Favorite "Red River Valley"

Driving in the country, how pleasant and natural to sing cowboy songs! Someone always starts "Red River Valley," it rings so tender and true:

"Won't you think of the valley you're leaving, Oh, how lonely, how sad it will be; Oh think of the fond heart you are breaking, And the grief you are causing me to see."

On the way home, sunset puts you in the mood for something slow and sad like "The Dying Cowboy," perhaps.

"Yet grant, oh, grant this wish to me: O bury me not on the lone prairie." You soon pick up the words of cowboy favorites if you've a song-book around. Or do you have shy guests? Start them on "Stutterin' Cowboy." It's an ice-breaker!

"He stuttered while roppin', and boys 'twas a laugh. To hear Bill shout 'Come on you, you, you, you calf.'"

Funny verses, sad verses—they are given complete in our cowboy song-book. Has 19 favorites with words, music; some have guitar diagrams.

Sends 15 cents in coins for your copy of "Popular Cowboy Songs" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

183—"Self-Instruction in Short-hand"

184—"Develop Correct Tennis Form"

121—"How To Improve Your Vocabulary"

For Better Lighting

Austrian Refuge Invents Device To Use In Blackout

An Austrian refugee, Gerald J. Holton, now a senior at Wesleyan University, Middletown, Conn., has constructed a street-lighting device for air-raid "blackouts" that he believes is superior to those now in use in England.

Holton said the present lights in Britain give a visibility comparable to starlight, which he contended was not sufficient for safety. He cited the fact that 1,000 pedestrians a month were being killed in England by automobiles.

Holder of an engineering certificate from Oxford, Holton explained his blackout device makes streets appear dark from above while having enough light to guide street traffic and permit rapid filling of air-raid shelters.

Holton was born in Berlin of Viennese parents and reared in Vienna. He went to England in 1938 and went through Oxford in two years. He left for America the day Italy entered the war. His ambition is to teach, because "it is one's duty to try to preserve values in chaotic times as these."

Might Need Both

Malcolm MacDonald urges Canadians, while embracing Uncle Sam, to keep, at the same time, one arm around John Bull. It is good advice, but the girth of John almost requires both arms, says the Toronto Star.

Mountain View W. I.

Six grandmothers and one great grandmother were entertained by the Mountain View W.I. at their July Meeting. An enjoyable program by the children and other entertainers was presented. Mrs. Harry Pearson was appointed delegate to the constituency conference held at Rugby on July 25th. The next meeting will be held at the home of Mrs. L. B. Fulkert on August 21st.

A special meeting of the Mountain View W.I. was held at Hall recently when Miss Z. McCaig of Olds School of Agriculture gave a most interesting demonstration on "Bazaar and Gift Articles." Many useful and practical articles were displayed and their construction explained. There were 22 ladies present and lunch was served at the conclusion of an enjoyable meeting.

Notes From the West

The Willing Workers of Elkton met at the home of Mrs. A. Snyder on Thursday, July 17th, and a quilt was tied and wool carded and pulled. The next meeting will be at Mrs. O. Blain on Aug. 7, when another quilt will be tied.

Mr. and Mrs. G. Adams and their son of the R.C.A.F. spent a long weekend with Mr. and Mrs. E. Parker and renewing old acquaintances in the Rugby district.

Mr. and Mrs. Alex Blain and family returned last Friday from a trip to B.C. where they visited with Mr. and Mrs. W. E. Brown.

Corporal E. Lowrie of the Inverness district was home for the week-end.

By Dr. K. W. Neathy
Director, Agricultural Department
North-West Line Elevators Association

Using Soil Scientists

Some time ago, in this column, I suggested that the necessity of reducing wheat production provides an opportunity to encourage the adoption of soil conserving practices. This opportunity was missed largely because we allowed the bulk of our grass and clover seed to be exported.

What about 1942? Perhaps we may be able to forget all about acreage reduction; but, if not, surely an effort should be made to see that the reduction is made in the interests of better farming. In northern wooded areas, yield and quality of wheat can be increased by the use of legumes plus artificial fertilizers. Grass could be used in the rotation with advantage to the wheat grower in many parts of the plains.

These problems differ greatly from one soil zone to another. In outlining an agricultural policy for 1942, all available technical information should be used. These ideas were embodied in a resolution introduced to the regional meeting of the Canadian Society of Technical Agriculturists at Brandon, by the Agricultural Director of The North-West Line Elevators Association, and seconded by the President of the Manitoba Wheat Pool. It is certain that soil scientists, agronomists (a polite name for field husbandmen) and economists could offer much helpful advice, and so, also could many farmers. The resolution called for the appointment of a committee of such persons with special training, and this can surely be endorsed by all of us.

Farmers who have not previously sown grass or clover seed should consult the nearest experimental farm or district agriculturist.

We can grow more wheat and better wheat on fewer acres, if we follow the examples of our best farmers.

Inverness Items

The Inverness Beaver Club met at the home of Mrs. Grace last month with 9 ladies present. Tea collection \$1.15. The Red Cross quota of sewing for the month has been finished and returned. More sewing was passed out and some returned and the rest of the afternoon spent in knitting. The next meeting is to be held at the home of Mrs. Joe Jones. At the close of the meeting Mrs. Grace served lunch.

Miss Lorraine Johnston of Innisfail is spending her holidays with her grandparents, Mr. and Mrs. Wiemer of Inverness.

Now is the time to bring your binder and combine canvases to Scott's for repairs.

Rugby Notes

A Dance is being held at the Rugby Hall on Wednesday evening August 13th. Orchestra "Ma Traynor's Hillbillies." On account of the war and conditions, there will be no anniversary supper this year.

The new Sunlight Soap—is the same pure, quick-dissolving soap that has lightened the wash-burden of millions of housewives... the only soap with a \$5,000 guarantee of purity... easy on the clothes and hands. Ask your dealer for the new, larger Sunlight bar and save money.

Now a bigger bar in a single carton. The 4 small bars in one carton will no longer be obtainable.

A PRODUCT OF
LEVER BROTHERS LIMITED

First Tank in Canada Produced by Canadian Pacific Railway

Gratefully accepted by the Government for use by the Canadian Army, the first of thousands of tanks to be produced at the Angus Shops of the Canadian Pacific Railway Company, Montreal, rolled off the assembly line and gave an impressive test performance before a large group of government and company officials, newspaper men and shop workers.

It was a new note in Canada's war history when this mighty war machine rumbled out of the shops, to be turned over to the Government by D. C. Coleman, vice-president, Canadian Pacific Railway, who said: "This machine is the child of sweat and tears. It will be followed by hundreds and thousands of others to help the Empire to its victory."

Hon. C. D. Howe, Minister of Munitions and Supply, praised Mr. Coleman, H. B. Bowen, chief of motive power and rolling stock of the railway, and the workers who had done the job. He said that the armor plate on the tank is equal to that to be found anywhere. Hon. J. L. Rignall, Minister of National Defence, spoke of the great need for all these machines as fast as they can be produced and thanked the railway and the workers for doing such a fine job. He revealed that 300 of the tanks being made at Angus will be for the British Purchasing Commission. Sir Clive Baillieu, head of the British Purchasing Commission in the United States, said this first tank was "a symbol of Canada's war effort and a portent of Hitler's doom."

The picture layout shows the tank being tested before D. C. Coleman, at left, and other officials. Inset a thorough examination by Mr. Howe, left; Mr. Rignall, right; and Brigadier K. Sturges, D.S.O., M.C., vice-chief of the General Staff, Department of National Defence.

Visual War Education

The value of ocular public demonstration and display of Canada's war effort in all its vast ramifications as a stimulus to further effort is only just beginning to be appreciated by the authorities in charge of the greatest single objective in our national history. It is a form of propaganda which is needed to bring home to many people of the country the fact that while much is being done in the fight to preserve liberty much more can be done if only every man can be brought to realize it, and the necessity for it.

The word "propaganda" is used in its best and proper sense, not with the idea of attempting to fool the people into believing something that is not so, but with the intention of uncovering the facts, presenting them in the most easily assimilable form and in such a manner that the people themselves can readily appreciate the implications the facts may convey and draw their own conclusions therefrom. That is the only enduring and effective type of propaganda. That is the sole form in which propaganda will not defeat its own ends. It is missionary work.

Something has already been done in this direction and what has been done is commendable, but the fact that there yet remain citizens of the country who are not yet fully conscious of the imperative nature of the demands for an all-out effort, that there are still some who are willing to concede the necessity for great sacrifices but are not willing to put into practice what they preach, indicates the necessity of more missionary work along the lines indicated.

Value Demonstrated

The interest evinced by the general public in army life as shown by the larger number of people who flocked to the military camps when they were first thrown open to public inspection on Army Day gives an inkling of the value of this form of demonstration. It is satisfactory to learn that from time to time similar occasions will be arranged by military districts on the authority of the Department of National Defence.

Major-General B. W. Browne, D.S.O., M.C., Adjutant General, who originated Army Day is quoted as saying: "This first chance for the public to see army personnel on and off parade, to see the complicated war machines, and to examine everyday life of those who have realized their responsibilities of citizenship in a democracy and have freely volunteered to defend that democracy, has developed a keener interest in the men upon whose self-sacrifice Canada must rely if freedom is to prevail."

Major-General Browne would not have gone astray if he had added that this visible demonstration of army life and all that it implies must have had some effect in encouraging those young and able-bodied men who are in a position to offer their services and have not yet done so, to face up to their responsibilities and to realize more fully, with the example before them that they, too, have a duty to a country which has afforded them so many privileges.

In Another Direction

That the value of visible display as a stimulus to the war effort is taking shape in the official mind was evidenced in another direction when the announcement was made that the Department of Munitions and Supply would stage an exhibit at the Canadian National Exhibition in Toronto, August 22 to September 6, in an effort to give visitors to the fair "some conception of the gigantic scope of the Dominion's industrial war effort."

At this exhibit, it is stated, will be seen made-in-Canada heavy infantry and cruiser tanks, field guns, anti-aircraft gun barrels, machine guns, rifles, searchlights, naval craft, Universal carriers, motor trucks, aerial bombs, shells, cartridge cases, fuses and a host of other things which civilians rarely see. Better still, action is to be brought into the picture, as Canadian men and women will be seen actually at work on machines which turn out Bren guns, Lee Enfield rifles, highly intricate fire control equipment and other essentials of modern warfare. Where demonstrations are impossible, huge photographic enlargements will tell the story of the "battle of the factories."

When one remembers that the Canadian war effort is the greatest activity which is dominating or should dominate the public consciousness it can readily be conceived that this display will greatly outstrip all others in popularity at the National Exhibition, that it will prove to be the greatest drawing card at the fair and that it will leave a deep impress on the minds of all who see it, an impress which should bear fruit in a greater war activity in all branches.

Unfortunately, the number of Western Canadians who will have an opportunity of seeing and benefitting from this great display of what the nation is doing to preserve its great heritage of liberty will be very limited. If this exhibit is to achieve the maximum results of which it is capable it should be made a travelling display, so that it may be seen and the lessons it should convey may be learned by westerners in the most graphic form—through the eye.

Let us have more ocular demonstration of the Canadian war effort and let every citizen from the Atlantic to the Pacific have an opportunity of seeing it.

Service Resumed

Money order service has been resumed between Canada and Ireland and Canada and French India through the British postal administration, a post office department announcement said at Ottawa.

Alaska's nearest point to the United States is 600 miles northwest of Seattle.

FEMALE PAIN

Women who suffer painful, irregular periods with nervous, moody spells due to functional cause should find Lydia E. Pinkham's Vegetable Compound simply marvelous to relieve such distress. Pinkham's Compound is made especially to help weak, tired women to go smiling through difficult days. Over 1,000,000 women have reported soothing benefits. WELL WORTH TRYING!

That's How She Felt

A pious but very irascible old lady, who lived by herself, was put out when her neighbors arranged a big picnic and failed to invite her. On the morning of the event, the picknickers relented and asked the old lady to join them.

"It's too late," she snapped. "I've already prayed for rain."

Dead were sometimes buried in graves 50 to 60 feet deep in the South American countries of Colombia and Ecuador.

Oliver Cromwell, in 1650, sent a group of Scottish prisoners, captured in the Battle of Dunbar, to Saugus, Mass., to work in the iron works.

Texas is the leading producer of cotton.

This Canadian Was Lucky

English Girl Gave Him Enough Coupons For Running Shoes

"One doesn't always expect a return for what one gives."

In that simple, honest sentence a breathless English girl, standing on a busy street corner at midday, epitomized the British people's philosophy of wartime sacrifice and their boundless generosity to Canadians overseas.

For nine months as war correspondent with the Canadian forces I've puzzled over an expression or a phrase adequate to explain this generosity, only to be told in ten words by this fair-haired stenographer in a little incident in a Southern England town.

I had tried to buy a pair of running shoes, but couldn't get them because, living with the army, I had no civilian ration book. Under the new clothing ration, purchase of a pair of these shoes required seven margarine coupons.

I left the shop, and a block away the girl caught up with me, out of breath with her run from the store, where she had been shopping and overheard the shopkeeper refuse me the shoes.

"You can get those shoes, really you can," she exclaimed. "I'll get you some ration coupons. I'll get some of my father's."

She looked at the "Canada" badges on my uniform. "You're a Canadian, aren't you?"

I stood there baffled by this sudden kindness from a complete stranger, mumbled my thanks and something about being unable to return the precious coupons.

"Oh, don't let that worry you at all," she replied, and added almost apologetically: "One doesn't always expect a return for what one gives."

Then, as if to make the offer more plausible, she said: "I have an aunt in Canada, you know. In Toronto."

We walked back to the store. She handed the shoe merchant the coupons and I got the shoes. Her name: Miss Muriel Bennett. Her aunt's: Miss Florence Bushell, a friend of Hon. Vincent Massey, Canadian High Commissioner in London, and Mrs. Massey. Miss Bushell aided in evacuating some British children to Canada and now lives in Toronto.

SELECTED RECIPES

APRICOT UPSIDE DOWN CAKE

- 1 1/2 cups sifted cake flour
- 1 1/2 teaspoons double-acting baking powder
- 1/4 teaspoon salt
- 4 tablespoons butter or other shortening
- 4 tablespoons butter
- 3/4 cup granulated sugar
- 1 egg, well beaten
- 1/2 cup milk
- 1 teaspoon vanilla
- 1/2 cup brown sugar, firmly packed
- 12 cooked apricots

Sift flour once, measure, add baking powder and salt, and sift together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add egg; then flour, alternately with milk, a small amount at a time. Beat after each addition until smooth. Add vanilla.

Melt 4 tablespoons butter in 8-inch iron skillet, or in cake pan, 8x8x2 inches. Add brown sugar. Stir until melted. On this arrange apricots, cut-side up. Pour batter over contents of pan. Bake in moderate oven (350 degrees F.) 50 minutes, or until done. Loosen cake from sides and bottom of pan with spatula. Serve upside down on dish with apricots on top.

A Fearless Commander

Soviet Pilot Steered Flaming Plane Into Enemy Fuel Tanks

A Russian statement reported that a Soviet pilot crashed his flaming plane into German gasoline tank trucks in an explosive suicide climax to an encounter at the front.

A shell from a German anti-aircraft gun was said to have hit the gasoline tank of the Russian plane, piloted by Capt. Gastelo, commander of an air squadron.

"The fearless commander piloted his plane, enveloped in flames, into a concentration of enemy motor cars and fuel tank cars," the account said. "Dozens of German cars and tank cars exploded together with the hero's plane."

The erect angle of young leaves protects them from losing moisture and presents less surface to sunlight.

Fifty-five trades are taught in the United States navy today.

The Mosquito Pest

Suggested Ways Of Dealing With This Torturer And Assassin

Mosquitoes are the tormentors of the insect world, with nightly inquisitions of torture. They cause much suffering in summer and some species are highly dangerous because they transmit malaria, dengue and other ills. Do not allow water to stand in roof gutters or drain pipes, as mosquitoes breed in stagnant pools. The old-time rain barrel is more romantic than sanitary.

The eggs of many common mosquitoes are laid in minute rafts consisting of several hundred eggs standing on end. Eggs of malarial and yellow fever mosquitoes are deposited singly and float about on the water. The mosquito larvae are the familiar "wigglers" often seen on the surface of quiet water. The larvae speedily become full grown and pass into the pupal stage. The pupae swim about in the water and are sometimes called "tumblers." After a short period the skin of the pupae splits and the adult mosquitoes emerge, spread their wings and fly off. Most species propagate a number of generations each year.

When the presence of mosquitoes in the bedroom precludes untroubled rest, spray the room before retiring, following the same procedure as that suggested for getting rid of flies. The mosquito, like the fly and some other insects, breathes through pores along each side of its body and must be enveloped in the spray for efficient results. The pyrethrum commonly used in household sprays paralyzes the nervous system and brings death.

If mosquitoes make the porch uninhabitable or spoil your fun on a picnic, spray your shoes, the back of your neck and your clothing lightly, and the mosquitoes will leave you alone for some time. At lawn parties, good results have been obtained by wrapping the legs of tables with paper and spraying this covering with insecticide. Modern household sprays also kill spiders, thousand-leggers, wasps, ants and other insects that may disturb outdoor meals.

British Pianos

Trade Has Increased Since The Advent Of The Radio

A few years ago, at the height of the wireless and gramophone entertainment boom, doubts were expressed by some serious musically minded persons whether there would continue to be any incentive or desire among the younger generation to learn to play a musical instrument unless they were adopting music as a profession.

Such fears were not shared by the piano trade, which has always maintained a steady output, though in Britain, like so many other industries, it has had to face severe competition in overseas markets from Germany.

Actually trade in musical instruments has increased rather than declined since the advent of radio, and some British piano firms are now selling more instruments to the Dominions than they were before the war.—London Times.

Prefabricated Houses

Seven-Room Dwellings Can Be Built In Nine Hours

A seven-room dwelling built in nine hours and costing about \$1,500 may be the first link in a country-wide chain of prefabricated houses designed to meet Canada's wartime shortage of living accommodation for industrial workers, officials of the Dominion housing administration said.

Result of studies conducted by Housing Administrator F. W. Nicolls and his colleagues, the model unit was constructed at a lumber plant at Ottawa. It is made of standard building materials, all procurable on the Canadian market, and can be dismantled. The latest in plumbing and lighting facilities go with the house.

The model house is a one-storey dwelling and has two bedrooms, dining room, living room, kitchen, bathroom and furnace room, making 576 square feet of living space. Floor, ceiling and roof are fitted in 12 separate sections each and the walls in 24 parts.

A Charming Gift

Queen Elizabeth, visiting the offices of the lord mayor's fund for air raid victims, saw an embroidered quilt bearing the names of 600 Canadian children and told the lord mayor she thought it a charming gift. With the quilt the fund received \$60, the result of the children paying 10 cents for the privilege of embroidering their names on it.

Tree Moved 32 Miles

A 52-foot elm tree weighing 35 tons was trucked 32 miles from East Gloucester to West Newbury at a cost of \$400 to fill a vacant space in the landscape of Mrs. William Dickie's estate at Gloucester, Mass.

National Scheme Of Social Security May Bring A New Order At End Of The War

"We are making plans for a great national public health policy in Canada, a plan of co-operation with the provinces, a plan of education, of correlation and co-ordination," declared Hon. Ian Mackenzie, Minister of Pensions and Health, in an address to the Canadian Club at Quebec. He added that the plan, "will ensure that those who return from overseas will not return to a devitalized homeland," and that it, "will endeavor to ensure such economic conditions that the 'right to health' will be accompanied by the power to attain health."

Stating that the Dominion Government had already given thought to what must be effected when peace returns, Mr. Mackenzie said plans had been laid down for the demobilization and for the after-care of the returned fighting forces; for pensions to those who have earned pensions; for the treatment of the disabilities of those rendered unfit, and "for the treatment of all those who have enlisted, for one year after the time of their discharge." There would also be preference of employment, in the Civil Service as well as in industry, for those who have served, he added.

"The maintenance of individual liberty, the preservation of democratic institutions, must be our guiding stars in the future, he asserted, but predicted that "some restrictions may be required during the period of mobilization."

Mr. Mackenzie foresaw that "the controls of industry may have to be kept in force until the new economy, reborn under new inspiration, is in full sway."

Predicting that a plan of reconstruction for Canada "must be co-ordinated with the plans that must be made in the United States and in other portions of the Empire." He named the following as some of the problems under consideration:

"The reasonable mobility of labor; the reorganization of industries for peace-time purposes; the organization of Canadian agriculture on secure standards—to return a secure living for the farmer and his family; the planning of timed public works, that can be initiated at the close of the war, so that they may absorb a small amount of skilled and much unskilled labor; the development of Canadian export industries that can employ Canadian labor in Canada by supplying goods to overseas markets."

Pointing to development of our great natural resources, and progressive development of highways to "link us closer together in the Dominion and to link our great centres

of scenic beauty closer to the travelers who come from friendly lands," Mr. Mackenzie asserted that there must be:

"Above all and transcending all, the development of a great national scheme of social security, by which the masses of our people shall never again know those fears that come from insecurity and poverty and want and distress."

"Never again, I hope and pray," said Mr. Mackenzie, "shall you and I know the Canada that we knew before this war broke upon us; when unemployment and relief and distress and hunger and poverty and want were rampant in the richest country in all the world. The new day, the new order, the new plan, must bring, will bring, a remedy for all that."

He declared that if old dogmas and old doctrines, old philosophies of government cannot solve the problem, then we must look to newer remedies and newer faiths. The heart of the world that is to come will be determined upon a complete solution of a problem that has baffled the statesmen of former years.

Looking to the world at large, the speaker asserted that peace must be based on collective security which rests upon "collective force and collective preparedness, and not upon collective idealism. There must be actual, practical sanctions, contributed by all."

Democracy must be nurtured and strengthened, and "even the standard of living, that is precarious in some nations, should be universalized and maintained by a real League of Nations which will be the guardian of the liberties and comforts of mankind."

"I believe," he declared, "that after the agony and the anguish of these tragic days have passed . . . the finest days in all the world will lie ahead; that those days will see the greatest rallying in the history of the world of the children of the city of man to the cause and inspiration of the city of God."

He believed, too, that we shall conclusively "win this war upon which we have engaged as crusaders of Christianity."

Mr. Mackenzie stated his belief that the masses of the people themselves are giving tremendous thought to fundamental principles, and that peace will not be decided by a "junta or a cabal, or any clique of rulers." It will be a peace dictated by the peoples themselves, he asserted, and post-war problems will be solved by the will of the masses of the people.

For Use In Emergency

Portable Kit Makes Blood Transfusions Possible Even On Battlefield

A new portable kit for giving emergency transfusions of dried blood plasma was described in the Journal of the American Medical Association.

An article by Dr. John R. Upton, Dr. B. E. Emory and Dr. R. B. Clark, all of San Francisco, said that widespread use of the kit would guarantee a constant and adequate supply for transfusions in shock, burns and hemorrhage and permit treatment in the first critical hours after injury.

The kit is so compact and well equipped that it can be set up and used at or near the place where an injury occurs. It was recommended for the Army, Navy and Air Force, the war having shown that dangerous and irreparable changes occur in many injuries if transfusion is delayed.

In actual warfare transfusions could be made at more advanced positions and even small boats could have the kits. They could be kept on hand also by smaller hospitals, emergency stations, fire houses, industrial factories and oil refineries.

The kit contains enough dried plasma, the liquid part of blood, and sterile water to make a solution equivalent to 500 cubic centimeters of whole blood.

The Indian tribal name Assiniboine means "stone boiler" from the practice of cooking by dropping hot stones into vessels of water.

Control Hide Prices

To Keep The Cost Of Shoes Within Reasonable Limits

An order-in-council giving the war, time prices and trade board control over the prices of hides, skins and leather was announced at Ottawa. Licenses will be required by those dealing in such goods in the future.

The authority was given the board on advice of the hides and leather controller, Maurice Sanson.

The export of leather, hides and skins from Canada is subject to approval of the wartime prices and trade board, and similar control over exports has been imposed in the United States.

"Stability in prices of hides, skins and leather would assist in the supplying of shoes for military purposes and to consumers at reasonable prices," the order said.

Really Out Of Luck

Seven-year-old Anna Rogers of Woodruff, S.C., had whooping cough, mumps and measles in the last 10 months—but didn't miss a day from school. Her whooping cough ended the day school opened. Mumps waited until the Christmas vacation. Measles came the first day after school closed for the summer.

Hens lay as many eggs from March to June as in all the other months of the year.

In high water periods the Orinoco river in South America is navigable for 1,000 miles.

A Pet Beaver

Only Known One In The World To Contract Whooping Cough

Probably the only beaver in the world to come down with the whooping cough is "Mickey," the pet beaver of 10-year-old Doris Forbes of Red Deer, Alta.

This is the story which Girl Guide headquarters has on file as an actual fact.

Early in 1939 a Red Deer Girl Guide, Jean Yuill, found a baby beaver which had been badly mauled by dogs. She took it to the Forbes home.

Mrs. Forbes, a nurse, sewed and bound up the wounds and the care given the animal by Doris, a member of the Brownies, made Mickey a devoted member of the family.

To-day Mickey weighs 70 pounds and enjoys his own private swimming pool on the Forbes' front lawn, but last winter when Doris took the whooping cough, Mickey slowly waddled upstairs and crawled into bed with her.

He was removed, but not in time. In a day or two he was sitting up on his hind legs, holding his stomach with forepaws and "whooping" in unison with Doris.

While it is asserted that Mickey has never done any damage to furniture, each morning in the winter all the movable furniture in the kitchen is found piled in the centre of the floor.

Mickey will eat pink ice cream, enjoys cake, preserved fruit and many other foods not usually fed to beavers, but fearing that some day he may decide to wander away Mrs. Forbes has encouraged him to subsist on a diet of twigs, leaves and vegetables.

Though he has been taken to the lakeside and to a creek for a swim several times, he has always returned to the family, and to date has shown no desire to return to wild life.

Some New Inventions

Many Queer Gadgets Shown At Exhibit In New York

You pushed a button; a mechanical mouse ran up a gadget, causing wheels to turn, gears to function, and—out came a lighted match.

Across the room a genial fellow devoured six pills and said no man ever enjoyed a more complete dinner.

Yes, another exhibit of the Inventors of America opened in New York. In the zigzag route between the mouse-match and the pills were such innovations as a safety strap-hanger for the bath tub, a pants clip and a reflector combination for cyclists, a crutch with a seat attached and anti-slip bathroom slippers.

A Brooklyn inventor had an alarm wrist watch that doesn't ring—it nudges your wrist. There's a gadget that rings when a fish bites at a line.

The pill man says that 12 of his nickel-sized discs equal in food value all the dietary needs of a person for a day. He eats them himself, and what's more he looks healthy.

The study of the geography of the moon is known as selenography.

In Reaching Air Parity Britain Is Now Able To Deal Heavier Blows

No Substitutes Available

Shortage Of Many Drugs In Canada Due To War

Mark up another "war casualty"—the drug industry. Loss of European supply sources through German domination, wholesale merchants estimated, has boosted drug prices in Canada 25 per cent beyond pre-war levels, with no definite indication of improvement yet in sight.

And officials at the health laboratories of the pensions and national health department admit there is a "definite shortage" of many basic pharmaceutical supplies used in preparation of medicinal supplies sold across Canadian drug store counters.

"Britain and the United States are doing a grand job in trying to supply us," one official said, "and our own laboratories are doing the best they can."

"But there are certain supplies of which substitutes just aren't available."

Here is the situation relating to some pharmaceutical products which the war has made difficult or impossible to obtain:

Caffeine, used in headache tablets, formerly was manufactured at Montreal from the theobromine obtained in the Netherlands. This supply now is eliminated and officials see little possibility of a substitute being obtained, although there has been talk of extracting caffeine from low-grade coffee and cocoa waste.

Belladonna, used in certain laxatives and liniments, was obtained from Germany and Hungary before the war. It has been produced in British Columbia to some extent but further cultivation will be necessary to meet Canada's needs.

Henbane, for stomach and kidney ailments, and stramonium, used in treatment of asthma are in the same class as belladonna.

Rose oil from Bulgaria and other perfume oils from France, Sicily and Turkey are no longer obtainable. Russian mineral oil also is cut off, but has been replaced by American oils on most markets.

Other drugs difficult to import include quinine, cinchona, citric acid, tartaric acid, potash of permanganate, potassium nitrate, codeine, lanolin and the botanical drugs such as ergot, lavender flowers, orange peel, cascara, camomile, malva flowers, buchu, henna, peppermint, gentian, arnica flowers, senega, anise, poppy, fennel, arabic, asafoetida, myrrh and benzoin gums.

A woman is someone who while the crack halfback is running the kick-off back 92 yards for a touch-down, notices that a fur coat three rows down is made of imitation mink.

Mount Aconcagua, in Argentina, is the highest mountain in South America.

Pineapple Scarf Has Many Uses

PATTERN 7038

Add loveliness to your home with this easily crocheted scarf to be made in various sizes. Done in fine cotton, its pineapple design matches that of the lovely doily, Pattern 6821, shown recently. Pattern 8038 contains instructions for making scarf; illustrations of it and stitches; photograph of scarf; materials needed.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Avenue E., Winnipeg, Man.

There is no Alice Brooks pattern book published.

Household Arts by Alice Brooks

This Scarf Matches Popular Doily

It is more than a year ago since the first British bomb was dropped on German territory. It fell on the seaplane base on the Island of Sylt. March 18th, 48 hours after the first German bombing attack on British soil. Nazi bombs were dropped on the Orkneys, causing a number of civilian casualties.

The second stage in Britain's counter-bombing of Germany consisted of attacks by the Royal Air Force on military lines of communication in western Germany. These attacks, begun May 11, 1940, closely followed the German bombing of Calais where many civilians were killed and injured and which heralded the German offensive in the west.

Since those first attacks, which resembled the preliminary sparring of a pair of boxers, the weight and tempo of bombing on both sides have grown.

Handicapped at the outset with a numerical inferiority the R.A.F. has had to adopt a bombing policy which ensured that its necessarily lighter punches landed where they would hurt the most. In a fight between a cruiserweight and a heavyweight, it is the heavier who can do the slogging. "Tit-for-tat" is no good for the lighter man. To win, he must fight with his brains.

But all the time things have been changing. The four-year lead in air re-armament which the Nazis held has been reduced gradually. Faster and bigger bombers, and crews to man them, have been pouring from Britain's factories and training schools, augmented by the growing resources of the Empire. The rising flood now is being further swollen by supplies of aircraft from the United States.

Recently Prime Minister Churchill was able to promise that the adverse balance of bombing under which Britain fought would be altered to the nation's advantage, and for some time past the R.A.F.'s attacks on Germany have been growing in weight.

In the raids on Germany, Britain now is using some of the biggest and fastest bombers in the world. High explosive bombs of a size and weight equal to anything dropped by the Nazis will find targets in the German capital and elsewhere.

Exact information about the damage caused by Britain's bombing of German targets is not easy to obtain. The network of the "SS," a rigid censorship and fast-working demolition and salvage squads see to that. But it is known definitely that already the R.A.F. has succeeded in inflicting tremendous damage to Germany's war effort, particularly in her transportation system.

One raid on Berlin caused a serious holdup on the subway system, while the bombing of the Westphalian armament and industrial city of Mannheim comparable in scale and weight to that on Coventry, dislocated dock installations, passenger and freight stations, engineering and chemical factories, and, to some extent, the industrial life of the city.

Sir Archibald Sinclair, air secretary, recently spoke of the rapid thrusts of the R.A.F. cutting deep into the flesh of the enemy. As the R.A.F. grows yet more powerful, bigger and more "beautiful" bombs, those thrusts may more resemble blows with a broadsword.

Kangaroo Tendons

Have Special Value In Certain Types Of Operations

Percy Spender, minister of the army in the Australian cabinet, announced that medical research workers at Brisbane had discovered that kangaroo tendons, when processed, have special value in certain types of operations and are also useful for the prevention and correction of deformities.

Medical men, Mr. Spender reported, say that kangaroo tail tendons are stronger than catgut and that its use is increasing in Australia. He added that Australia was the world's largest producer of catgut, being obtained from sheep, and used instead of silver wire or silk by physicians.

NOTICE

A Clean Community acts as a preventative against disease. — "Each householder can and should be a guardian of HEALTH."

The dread fly — carrier of disease — is again with us.

Every effort should be made to keep your premises fly proof. Burn all garbage, but if it cannot be burnt, wrap well and place in fly proof container, for regular removal by the scavenger. Have windows and doors properly screened and if the flies get in, swat'em.

A suggestion re. outside toilets: a pail of old car oil poured in once or twice during the summer will prevent flies gathering. The garages and service stations will, no doubt, be glad to furnish the oil which has been drained from cars — ask them.

Your co-operation in the past is appreciated, give us it again, for a clean town free from disease.

The Annual Memorial Service under the auspices of the Canadian Legion, will be held at the Butte on Sunday, August 10th at 3 p.m. Rev. J. M. Fawcett will conduct the service.

Mr. Bill Grange of Harmattan who for the past two months has attended the R.C.A.F. at Calgary left for the East last Monday. Bill is a mechanic in the Airforce and we wish him the best of luck.

A. A. Perrin had the misfortune to have his leg broken at his farm east of town when a horse fell on him. Fortunately he was able to attract the attention of Harold Dickau, who took him to a Calgary Hospital for treatment.

In the Sweepstake on the last heat of the trotting race at the Fair last Wednesday, Russel Ady won first with a ticket on "Dizzie Blondie." Wm. McCulloch 2nd; J. W. Wordie 3rd; Esther Ernst 4th; and W. A. Ross 5th.

The marriage of Jean Elizabeth, daughter of Mr. and Mrs. P. McNell, of Didsbury and Adam Schneidmiller, son of the late Mr. and Mrs. Schneidmiller, of Calgary was solemnized in the Lutheran Church, Calgary, July 15th.

Mr. C. R. Ford was elected president of the Alberta Association of Teachers of Industrial Arts at the annual meeting held at Edmonton last Friday. At the meeting he gave a talk on his recent work at Bradley College of Arts at Peoria, Ill., which he has attended during the past three summers.

It is announced by Mr. Oliver Stevens that the Greyhound Bus Station has been moved from the Hotel to the building recently occupied by the Public Grocery. Mr. Stevens says that the general public are welcome to use the waiting room for their convenience and a place to meet friends.

"The Son of Monte Cristo", in which Luis Hayward slashes his way to fame even greater than Dumas' dashing adventure, is showing at the Didsbury theatre this week-end. Please note that beginning this week-end shows will only be held on Fridays and Saturdays.

Guaranteed solid leather harvest shoes for \$2.75 at Scott's.

Dance at Melvin August 6. Music by Bowden Boosters.

Don't overlook the men's tan elk solid leather shoes built to wear, at a low price of \$2.95 at Bergeby's.

SHOWMANSHIP—Harvey Stevens

Fruit Wanted

The ladies of Didsbury and district are asked to put up an extra quart of fruit, when they are canning, for the Woods Christian Home. There is no need for us to enumerate what the Woods Home has and is doing—It is well known here.

The canned fruit may be left at Studer's, Jenkin's, Halliday's, Hawkes' or the Barber Shop. Labels with the name of the donor will be put on the sealer and the empty sealer will be returned.

Obituary.

The funeral of Rasmus Peter Nielson, aged 70, who died at Rocky Mountain House on July 26th, was held at the M.B.C. Church on Tuesday.

Born in Denmark, he came to Alberta in 1903 and settled at Olds. Ten years later he moved to Alsask where he farmed for 27 years, then moving to Rocky Mountain House.

He was married to Miss Clara Olson in 1904. He was a member of the M.B.C. Church, having joined in 1927.

He leaves to mourn his loss, his wife; one son, John, of Gainford, Alta.; a daughter, Mrs. William Turnbull, of Harmattan; a brother, Peter, at Arcadia Valley; and 2 brothers and 1 sister in Denmark.

Funeral services were conducted by Rev. C. J. Hallman and the interment took place at the Didsbury Cemetery.

Piano Tuning.

Gavin Spence and Virgil Goulson official tuners for the large Vermilion School Division, having completed their duties for 1941, are now busy on the Ponoka Division and due in Didsbury within two weeks. Leave orders at the Pioneer office.

BIRTHS

Born at the Olds Hospital on July 28th, to Mr. and Mrs. W. K. Snyder, a daughter.

CARD OF THANKS

We wish to express our thanks to the friends of Didsbury and district for their kindness and expressions of sympathy during our bereavement. Also for the many floral tributes.

Mrs. R. Nielsen
and the family.
